

TravelTide Rewards Program

Customer Segmentation & Perk Assignment

Alberto Diaz Durana • October 2025

Rigorous Analysis of 5,765 Active Customers

- 5.4M sessions analyzed, filtered for engagement (7+ sessions) and data quality
- 65 behavioral features including booking patterns, spending, and perk preferences

5,765

Qualified Customers

\$23.4M

Total Lifetime Value

65

Behavioral Features

All Five Perks Have Meaningful User Bases

Balanced Distribution: Despite cluster concentration, perks range from 13.8% to 24.3%

Why This Matters: Individual preferences within clusters are more diverse than averages

Decision: Deploy all five perks - no elimination needed

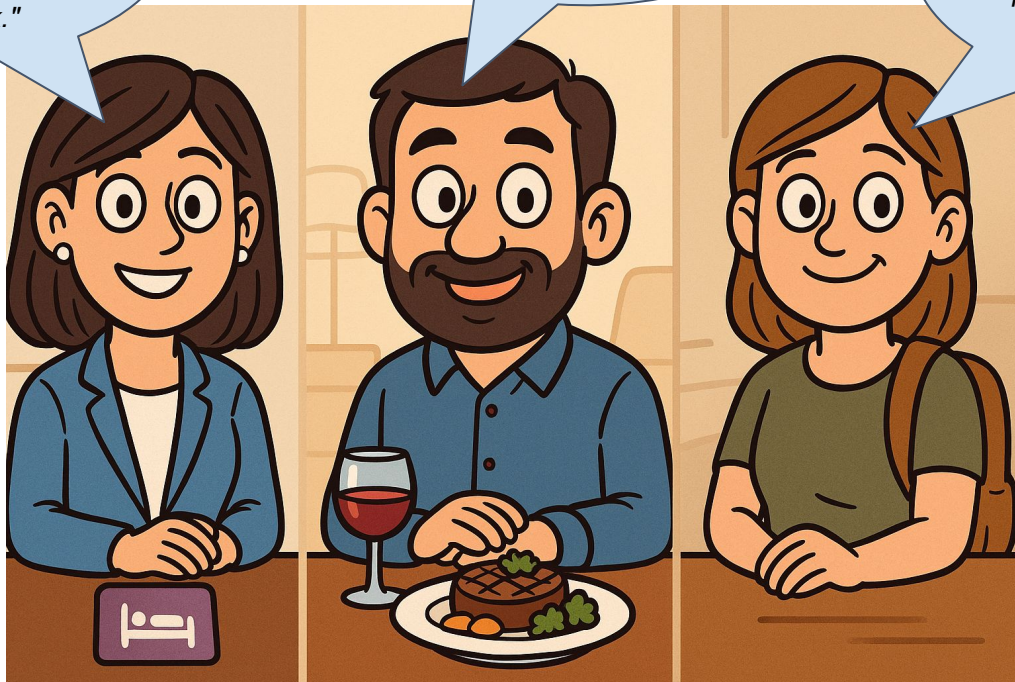

Three Clear Behavioral Segments

Premium Paula: "I travel often for work and pleasure. Give me perks that make my hotel stays better, and I'll keep coming back."

Dining David: "Travel is about experiences. A great meal makes the trip memorable."

Flexible Fiona: "I need flexibility more than fancy perks. Let me change plans without penalty, and I'm happy."

Three Clear Behavioral Segments Drive Different Strategies

Metric	Premium Paula (Cluster 0)	Dining David (Cluster 1)	Flexible Fiona (Cluster 2)
Size	4,596 (79.7%)	287 (5.0%)	882 (15.3%)
Avg CLV	\$4,985	\$768	\$319
Total CLV	\$22.9M (98%)	\$220K (1%)	\$281K (<1%)
Behavior	Premium hotels, frequent	Dining-focused, experiential	Budget, flexibility-focused
Top Perks	Hotel Night (28%) Meal (26%), Bag (24%)	Free Hotel Meal (dominant)	No Cancel Fee (dominant)
Strategy	Retention priority	Growth opportunity	Volume play
